Subject: Inactivation of Electrolux Individual Construction Permit TN0081302
CC: Brazile, Joellyn; Caudle, Cliff

Katherine,

Thanks for taking the time earlier this week to bring me up-to-date on the Electrolux project in Memphis. With the changes to the scope in the project, it certainly appears that it will be much more expedient to use the CGP only, and not have to contend with individual permit coverage.

As we discussed, since the individual permit will not be needed, we need to temporarily inactivate the individual construction permit (TN0081302) so that it is no longer on EPA's "clock." I have inactivated the permit in WPC's internal database, and by copy of this email, I am asking that the Enforcement and Compliance section inactivate the permit in EPA's database. As we also discussed, if for some reason Electrolux's situation changes later in the project, the inactivation will not delay the project schedule in any way. We can re-activate the permit immediately and start working on the individual permit as soon as we receive notice.

There is only one administrative restriction with the inactivation. The permit can only be inactivated for a period of 3 years. But as we discussed, since that is well within the time-frame of your project, there should be no impact on Electrolux's situation.

Best of luck on the project and let me know if I can be of any assistance.
